Claim Objections

1. Claim 6 should depend on claim 3, not claim 2.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1, 2, 9 and 19-21 are rejected under 35 U.S.C. 102(a/b) as being anticipated by Applicant's Prior Art.

As described on page 2 of the specification, Applicant's Prior Art Fig. 11, block 112 contains propagation delay detector and latch elements as recited in claim 1. Also shown are launch ICLK and sample SCLK signals.

Further shown is a digital word input PDW and an analog output at a power node PN. Thus, Fig. 11 is seen to comprise a DAC 1114/1116/1120 as recited in claim 2.

The launch and sample signals are clock and quadrature signals as recited in claim 9.

The circuit performs the methods recited in claims 19 and 20.

Further shown are latch signals PDW and control signals BW as recited in claim 21.

Conclusion

4. Claims 3-8 and 10-15 objected to as being dependent upon a rejected base claim, but may be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims. Claims 16-18 appear to be allowable over the Prior Art of record.

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jeffrey S. Zweizig whose telephone number is (571) 272-1758. The examiner can normally be reached on Monday thru Wednesday 6:00 am to 6:00 pm.
